

| Anti-Vibration | Anti-Shock | Heat-Resistant Fanless Design |
Real-Time Recording, Live GPS Tracking and Vehicle Fleet Management

The New Definition of a True Rugged **Mobile** *GET*
you could **DVR**

Aluminum Heat-Sink Structure | Optimizing Heat-Dissipation Performance

Heat could be Dissipated through the Entire Aluminum Case at its Maximum Surface Area of the Heat-Sink Structure Design for Lowering its Temperature for the Best Performance.

Anti-Destruction One-Piece Superstructure | Preventing Damages from Brute-Force Attack

The Superstructure is Formed around 1 cm Thickness in One-Piece Method, it is very Strong so that it could Avoid the Serious Damages from the Purposely Brute-Force Attack.

Heat-Resistant Fanless Design | Wherever Tough Environment you could Install

Wide Operation Temperatur
-10 ~ 60°C Allowed. Fanless Design is also free from the potential Internal Heating Problem caused by the Fan itself with Dust Remained.
(Patent No. US7,468,555 B2)

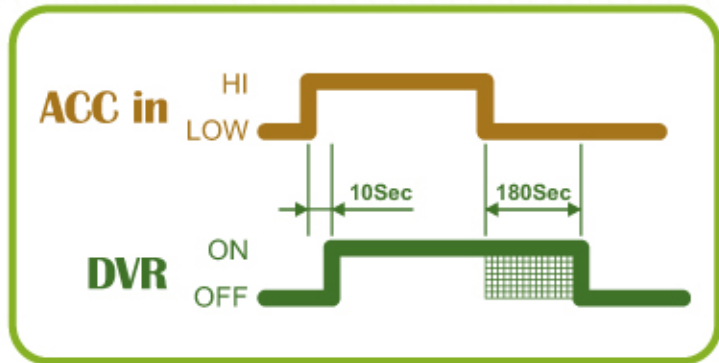

True Anti-Vibration, Anti-Shock | US Military Standard MIL-STD-810F/G Certified

For Mobile Application, the Stable Performance is the Foundation. With the US Military Standard Certified Design, we do provide you a True Anti-Vibration / Anti-Shock DVR.

| Power ON/OFF with Time Delay Built-in | For Surge Protection and Extending Record

For Avoiding Sudden High Voltage from Engine Start, there is 10 sec Time Delay when Power ON. There is also 180 sec Time Delay when Power OFF for continuing recording while Driver is still there.

| Removable HDD Tray | Easy Change, Efficient Management

For Fleet Management, Time is Money for every On-Duty Vehicle, you could take out the Recorded HDD easily for Exchanging or for other Purpose based on the Removable HDD Tray Design.

| Cable Holding Rings | Stable Performance and Favorable Follow-Up Care

Cables could be Fixed Tight with Cable Holding Rings for Stable Performance during Vibration. It could also make the Installation Neat and Tidy for easier Maintenance within limited space inside a Vehicle.

(Optional)

| Customized Application Power Box | Supplying 12V DC to Cameras and Recording at Ignition OFF

Together with the Optional Power Box, you could Power 4 Cameras with Stable 12V DC for Better Performance and as well as continually Record after the Ignition OFF with Adjustable Time Delay (Max. 12hrs).

PRODUCT INSTRUCTION

SYSTEM STRUCTURE

| Advanced 3G/GPRS Support Compatibility | Matching all kinds of Local Dialing Services

Only with Complete Open-Format Setting Options for connecting well with Your Own 3G Service of the Local Dialing System, you could then be real beneficial from the 3G Remote View supported by the DVR.

- Available Settings of
 - Account / Password / Modem Model
 - Baud / Phone / APN / 3G Service Type
- Support 3GPP2(CDMA) and 3GPP(UMTS)
- Support 2.5G / 2.75G / 3G / 3.5G / 3.75G

| Effective GPS Tracking Intergrated with Video | Know where they are, See what they See

With Licensed Central Management System, You could know where the Current Position is for each of the vehicle, and you could also check the Live View Remotely of the Selected Vehicle through the 3G Connection.

- Up to 64 Live GPS Tracking Markers Supported
- Video, the Moving GPS Marker and the GPS Tracking Route over the Map could be Displayed Simultaneously.

| Flexible GPI Snapshots | Making your Own Applications

You could define your own Snapshots for certain situations with GPI from an Alarm Trigger or a Quick Button.

- Each Channel could have an independent Snapshot to be stored inside the HDD.
- The GPI Trigger itself could be also considered as a Mark for doing further Search / Playback for Video Clips.
- It is even more convenient that you could Export all the Snapshots within a selected period into your USB Flash Disk in one time.

| Video Previews with Thumbnail Browse | Quick and Accurate Frame Search with Time Zoom IN

For quickly Search the Video of the Interested Subjects or more accurately Locate some Specific Point, it is very convenient the Previews could be displayed at its First Frame for each Time Unit from the Selected Period. You could then Judge very easily by Taking a Glance and also do the Time ZOOM IN for getting into more Details during Each Section.

Efficient Configuration File Upload | Easy, Consistency and Time Saving

You can Backup the System Configuration into a File for further Restore in case of something wrong that cause loss of Configuration Settings. Or you could Upload it into another DVR for having exactly the same Settings as efficient Fleet Management.

(Optional)

Automatic File Synchronization | Convenient Fleet Management Back-up

With the Third Party FileSync Application, the File Server will do the File Synchronization automatically over the WiFi Network. The Management could investigate the Recorded Files at the File Server when necessary instead of go to each Vehicle for downloading the Files separately.

(Optional)

Integration with Mobile POS | Text Search for the Interested Video Clips

The Text Messages from the Mobile POS including Customer's Name or Delivery Details could be recorded into the DVR. So you could have your Video with the Text Message overlaid. Furthermore, you could easily find the Required Video Clips for Managements by just searching the Keywords.

(Optional)

Data Record with Digital Tachograph | Customized Fleet Management Application

The Collected Data from a Digital Tachograph (also called In-Vehicle Data Recorder) including the Speed Information and Car Status etc. could be recorded into the DVR as well. You could even playback both the Video and the Recorded Data together for better evaluation on One's Driving Behavior.

SPECIFICATIONS

Model No.		Rugged Mobile DVR MR411							
Video					Communication				
Video Mode	SEVENFOLD (Live, Record, Playback, Backup, Network, WIFI and 3G)				Network Interface	USB PORT: Support 3G / GPRS / WiFi; RJ45 PORT: 10M/100M/1Gbps			
Video Input	BNC 4 INPUTS **CHANGEABLE / CUSTOMIZED AVAILABLE**				Network Protocol	3G, GPRS, WiFi, TCP/IP, DHCP, NTP, HTTP, FTP and E-MAIL			
Video Output	Main Monitor	RCA 1 OUTPUT			3G Technology Support	3G (3GPP2: CDMA; 3GPP: UMTS)			
	VGA	VGA 1 OUTPUT **OPTIONAL WITH THE SECOND VGA OUTPUT**			Multiple E-Mail Receivers	YES (up to 16 Accounts Allowed)			
	Dual	YES (Both RCA and VGA Outputs can be Displayed at the Same Time)			Two Way Audio	YES (Two Way Audio Communication can be Supported with Remote Site)			
Performance Adjustable	YES (Image Performance per Channel can be Adjusted)				Mobile Phone Surveillance	YES (Support iPhone and Windows Mobile Phone etc.)			
Image Rotate	YES (Flip-Vertical or Mirror-Horizontal per Channel can be Adjusted)				GPS Tracking Support	YES (up to 64 Vehicles can be tracked at the same time)			
Audio					Remote				
Audio Input	Main Board	EAR PHONE JACK 1 INPUT, MIC INPUT			CMS Software	Licensed Central Management System Application Bundled			
	External	RCA 4 INPUTS **CHANGEABLE / CUSTOMISED AVAILABLE**			IE Browser Support	YES			
Audio Record Channels	MAX. 4 CHANNELS				FTP Support	YES			
Audio Output	EAR PHONE JACK 1 OUTPUT				Remote Live View	YES (Supported from CMS or IE Browser)			
Audio Backup	YES				Remote Playback	YES (Supported from CMS or IE Browser)			
Audio Format	8Kx16bit ADPCM Mono				Remote Event Alerting	YES (Supported from CMS)			
Two Way Communication	YES (Two Way Audio Communication can be Supported with Remote Site.)				Max. Channels Display	up to 64 Channels can be Displayed at the Same Time via CMS			
Display					Alarm Pop-up	up to 16 Channels can be Displayed when Alarm via CMS			
Image System	NTSC		NTSC		Multiple View Support	Main Display, Map and Alarm Pop-up can be Displayed in Different Screens			
Frame Rate / Resolution	up to 120fps	640x480	up to 100fps	640x480	Remote GPO Control	YES (Supported from CMS)			
Full Screen Display	YES (Full Screen Display can be Supported.)				Dual Streaming	YES (Supported from CMS)			
Record					Mobility Tracking				
Video Format	MPEG 4				Live GPS Tracking Display	Support Live GPS Tracking integrated with On-Line Map			
Image System	NTSC		PAL		Live GPS Tracking Markers	Support up to 64 Live GPS Tracking Markers at the Same Time			
Record Frame Rate (Max.)	120fps		100fps		Live Tracking View	Both Video and GPS Tracking can be Viewed at the Same Time			
Frame Rate / Resolution	up to 120fps	320x240	up to 100fps	320x240	Playback Tracking View	Video / GPS Marker / Tracking Route can be Displayed Simultaneously			
	up to 60fps	640x480	up to 50fps	640x480	Customized Applications **OPTIONAL**				
Record Adjustable	YES (Frame Rate / Resolution / Image Quality per Channel can be Adjusted)				Digital Tachograph	Through RS-232, Record Vehicle Data with Video			
Power-On Auto Record	YES				POS	Through RS-232, Record POS Data with Video			
Schedule Record	YES (Normal, Record, Motion Detect, GPI Trigger, MD+GPI)				Power Box	Supplying DC 12V to Cameras / Recording at Ignition OFF			
Pre-Alarm Record	YES				GPO Box	Vehicle Use Relay Out, able to Control up to 30mA			
GPS Tracking Record	YES				Completed HDD Files Investigation				
Weight Record	YES				Auto File Synchronization	Get Files through WiFi Network, Do the Investigation at File Server			
Mutual Record **OPTIONAL**	Outside Data from POS / Digital Tachograph / Others can be Recorded				Direct Link into PC	Read Files by Linking into PC, Do the Investigation at PC			
Water Mark	YES (Water Mark Supported for Preventing Fraud Image Modification)				Play with Another DVR	Read Files at another DVR, Do the Investigation at the DVR			
Storage / Playback / Backup					OSD & DVR Control				
Local Storage	Built-in with Removable HDD Tray, for 1 x 2.5" HDD (SSD also Supported)				GUI	YES (Friendly Windows-Like Graphic Interface Design)			
Remote Site Storage	YES				Authority Management	YES (1 Admin and 16 Users with Password Control)			
Playback Method	Searched by Time, Motion Area or Events				PTZ Control	YES (Available via RS-485)			
Playback Adjustable	For Snapshot Capture Only, Brightness and Color can be Adjusted				Multiple PTZ Control	YES (Available via Network through IE / CMS and Mobile Phone)			
Thumbnail Browse	Quick and Accurate Frame Search with Time Zoom IN				Multiple PTZ Protocol	YES (Support Pelco-P, Pelco-D, and Panasonic etc.)			
Backup Format	Proprietary **AVI FORMAT CONVERTER AVAILABLE**				RS-485	YES			
Flash Drive Backup	USB 2.0 Interface, Support Flash Drive / Pen Drive				RS-232	YES			
HDD Backup	USB 2.0 Interface, Support Portable HDD				Mouse Control	YES (Available via USB 2.0 Interface)			
DVD Backup	USB 2.0 Interface, Support External DVD Burner				Keyboard Control	YES (Available via USB 2.0 Interface)			
Remote Site Backup	YES				Firmware Upgrade	YES (Available via USB / Network)			
Network Neighbor	Video Files inside DVR HDD can be Visited via Network Neighborhood				CMS Software	Licensed Central Management System Application Bundled			
Event					General				
Event Method	Supported with Motion Detection, Video Loss Detection and GPI Trigger				OS	Embedded Linux, OS and Firmware Embedded inside DOM			
Sensor Input	ALARM 4 INPUTS				Auto Operation	YES (Auto Operation with Engine Ignition)			
Sensor Output	ALARM 4 OUTPUTS				Auto Power Delay ON	For Avoiding Sudden High Voltage from Engine Start: 10 seconds			
Sensor Type	N/O, N/C				Auto Power Delay OFF	For Extending Recording while Driver is Still Inside Vehicle: 180 seconds			
Motion Detection	YES (15x20 Individual Sections per Channel can be Defined)				Configuration File Backup	Configuration File can be Backup for Further Restore or Upload			
Motion Detection Sensitivity	YES (Sensitivity with 5 Levels can be Adjusted)				Power Input	Wide Voltage Range DC 9V - 32V			
Buzzer	YES (System Buzzer Warns when Alarm is Triggered)				Power Consumption	Low Power Consumption Only with 15W			
Remote Event Notification	YES				Operation Temperature	Wide Working Temperature -10 ~ 60°C			
Upload	YES				Humidity	10 ~ 90%			
Event List Export	YES				Dimension	240(W)x160(D)x65(H)mm			
Flexible GPI Snapshots	Snapshots per Channel can be Captured with GPI Trigger and Stored				Weight	3kg			
Snapshots Batch Export	Snapshots within a Selected Period can be Exported in One Time				Certificates	e-Mark(e13), FCC, US Military Standard MIL-STD-810F / G Certified			

Power Box

Supplying DC 12V to Cameras /
Recording at Ignition OFF

GPO Box

Vehicle Use Relay Out,
able to Control up to 30mA

GPS Modem

For Tracking the Vehicle
Position over the Map

**SATA to USB
Converter with
Power Supply**

For Reading Files by
Linking HDD directly into PC

Digital Tachograph
(also called In-Vehicle Data Recorder)

For Collecting Speed Information
and Car Status etc

HDD Tray

For Easy Switching the HDD
with Extra HDD Tray
